## TRAINING

DATE: March 27, 2024 TRAINER NAME: RUBIA GARCIA (CEC AIS)

	REVISION TO NBIC QC FEATURES, 1.5.1 E2023 VS E2021		
#/RUE			
E2023 I.S.1 PREAMBLE/INTRODUCTION. The following is a guide for identifying features which	E2021 1.5.1 PREAMBLEIN TRODUCTION: The following is a guide for required features o a Quelty System which shall be included in the organization's Quelty System Marcal.		
LCCLD AND AND AND AND AND AND AND AND AND AN	a Quality System which shall be included in the organization's Quality System Marcal. As a minimum, each organization shall address the required feature relative to the scope of work's be performed. Organizations shall explain their hitlest, capability and applicability.		
and any set approximate to many defined for maintaining full responsibility for code compliance by the interval Barry collections are clearly defined for maintaining full responsibility for code compliance by the interval Barry Conflicte Hidder certifying the work.	applicability by each required feature cullined in this section. Work may be subcontracted provided		
I) Title Page to the the page shall contain the Certificate Holder's legal name, physical address, and scope of work.	National Road and Annual Statement (National Statement) a) Table Page The name and complete address of the company to which the National Board Certificate Authorization is issued shall be included on the Sile page of the Quality System Maxual.		
The scope of work shall clearly indicate the type of repairs and/or alterations the Certificate Holder a capable of and intends to carry cut. The scope of work indicated shall include the following, as			
applicable. 1) Repairs Only at either Step or Field or Both. 2) Alterations Only at either Step or Field or Both.			
I Papainia Chriyat aither Shop or Fieldon Both 9 Alexationa Chriyat aither Shop or Fieldon Both 19 Papainia and Alexana at aither Shop or Fieldon Both 1) Matallic Repainia			
0) Non-Medallic Regains 0) Design Cinty			
	Ni Contente Dana		
b) Contents Page The Quality System shall contain a page listing the contents of the manual by section, number (if splicable), envisions level, and date of each section, as required for manual control.	b) Contents Page The manual should contain a page listing the contents of the manual by subject, number (if applicable), and real-sion number of each-document.		
The Scope of Work moved to a) Title page	ri Smaa of Work		
	The manual shall clearly indicate the scope and type of repairs or alterations the organization is capable of and intends to carryout.		
c) Statement of Authority and Responsibility	Bothermann et Antoning and Responsibility and Tableson et Antoning and Responsibility and the second particular comparement of the supportant combined on advanced. Further, the Statement and an advanced of the supportant combined on the second and the second and the support of the support of the support of the support 21. The filter of contrast and the support of the support of the support 21. The filter of contrast and the support of the support of the support 21. The filter of the support of the support of the support 21. The filter of the support of the support of the support of the support 22. A summer that of the support of the support of the support of the support 23. A support of the support of the support of the support of the support 24. A support of the support of the support of the support of the support 24. A support of the support of the support of the support of the support 24. A support of the support of the support of the support of the support 24. A support of the support of the support of the support of the support 24. A support of the support 24. A support of the suppo		
c) Statement of Authority and Responsibility visited Statement of Authority and Responsibility shall clearly identify but the Quality System has the uil support of management and endorsed by signature of a senior management official. The Datement shall also include:	A dated Statement of Authority and Responsibility, signed by a serior management officia of the organization, shall be included in the manual. Further, the Statement shall include		
Addition to that and a constant of the second of the secon	requirements of the NBIC and the Jurisdiction, as applicable; 3. The tills of individual also has the suffering and supported bits channed altheremerics the		
2) The tide of individual who has the authority and responsibility charged with the development and implementation of the QualitySystem and the freedom to identify quality problems, and to initiale,	Quality System is implemented as described, and confirming the freedom to identify quality problems and to initiate, recommend and provide solutions;		
	<ol> <li>A statement that if there is a disagreement in the implementation of the Quality System the matter is to be referred for resolution to a higher authority and shall be resolved in a</li> </ol>		
() A statement that conflicts or disagrees with in the implementation of the Quality System shall be prought to the attention of the Centificale Holder's senior management official for a resolution that will	rearise that we not control with cost, jurisdiction equatory autors for Quarty system requirements; and a statement of the full support of management for the Quality System.		
excerning and provide malations and when required, step or prohibitil work from continuing; and (A statement that conflicts or disagress with is the implementation of the U and Spatien shall be anough to be anisotrop of the Conflicts Molecules are not reasongered of the U and Spatien shall be at conflict when sharped and provide any advertise or County Spatien requirements. (A counting System Constant)			
n Curite Dates and dates have delete all adicident and have a biblin as descents will	e) Manual Control The manual shall include the necessary provisions for revising and issuing documents to		
be identified, and how distribution and retrieval will be achieved to ensure only the latest accepted reteions are available for use. In addition, the following shall be documented.	e) Manual Control The menual shall include the necessary provisions for revising and insuing documents to keep the menual current. The title of the individual authorized to approve revisions shall be included in the menual. Revisions must be accepted by the Autorized Inspection Agency prior to issuance of the menual and to implementation.		
<ol> <li>The title of the individual responsible for the preparation and approval of the Quality System including review of code editions, standards, and juristicitional requirements.</li> </ol>	prior to issuance of the manual and its implementation.		
<ul> <li>Acceptance from the Authoridad Inspection Agency prior to issuance and imperivation of the Quality System.</li> </ul>			
I) Certification Ahere electronic certification of documents is used, the Quality System shall include provisions describing the controls and safeguards that are employed to ensure the integrity of the certification.	No reference to Certifications		
leaching the controls and safeguards that are employed to ensure the integrity of the certification.	l		
I) Organization The Quality Sphere shall include an organizational chart which reflects actual levels of authority	f) Organization An organizational chart shall be included in the manual. It shall include the title of the		
() organization The Guildy Spinner shall include an organizational chart shich reflects actual levels of authority and level of communication associated with functional job titles identified with authority and appropriabilities associated with functional job bittes identified within the QuildySpinner, but can affect the quality of the repair or alteration, shall be clearly defined and documented.	(1) Organization Are cognization chart shall be included in the neural. It shall include the title of the based or all departments or obtains that parters in factors that can affect the quality of the repair or abstraction, and it shall have be indicately between activations and department of actions. The neural whall identify the title of these indicates responsible for preparation implementation; or exclusion of the Can be department. The responsibilities in that a clustery addeed and the indicates in that leads by department the responsibilities in that an clustery addeed and the indicates intal time are organizational tweaters and autority in duffit.		
an arrest the quality of the repair or alteration, shall be clearly defined and documented.	evenor. I ne manual shall identify the tills of those individuals responsible for preparation implementation, or writtration of the Quality System. The responsibilities shall be clearly related and the individual with the termination of the responsibilities and the termination of the response of the termination of the response of th		
	<ul> <li>In the regarding of the regarding of the term of autority to fulfill those responsibilities.</li> </ul>		
() Drawings, Design, and Specifications The Quality Settem shall contain controls to ensure the all annihubits design before the	p) Drawings, Design, and Specifications The manual shall contain controls to ensure that all region information, and material		
g) Drawings, Dasign, and Specifications Pra Qualty Spriner shall contain controls to ensure that all applicable design information, drawings, adculations, specifications, and instructions are prepared or obtained, controlled, and interpreted in accordance with the acope of work and the original code of construction,	g) Drawings, Design, and Specifications The menual shall contain controls to resure that all design information, applicable drawings, design calculations, specifications, and instructions are prepared or obtained, controlled, and interpreted in accordances with the original code of construction.		
nicitation of unique identifying numbers. 1) Initiation of unique identifying numbers. 2) Description of the scope of work.			
	1		
I) Drawings and other pertinent information (i.e., Code Edition, pressure, temperature, minimum design mati temperature, nondestructive examination (NDE), heat treatment, weld details.			
ec.). B Review of design calculations, drawings, material specifications and process control sheets.	1		
1) Repair and Ateration Methods	b) Repair and Attention Nethods The menoi shall include controls for sensing and elemetions, inclusion mechanical		
b) Repair and Alteration Methods the Quality planes that describe the methods for performing and documenting repairs and alterators and/ord data legement the inspect to alterative that stages specific impections are to be outramed. The method of regair or alteration must have prior acceptance of the impector, and then negalively, the initial prior alteration must have prior acceptance of the impector, and then negalively, the initial prior and the specific or alteration of the impector.	b) Rappits and Attention Methods The manual shall include carbicits for repairs and alterations, including mechanical assembly proceedance, materials, condustructive examination methods, pre-heat, and posterioficheal treatment, as applicable. Special requirements such as commutabilic repair and alterations to applies and Determinization determinating paties present-relations;		
then neequired, the jurisdiction.	assempty processive, mean say, concerning a section of memory, pre-mail, and portwelf heat transmission, an applicable. Special requirements such as a contrability repair and alterations to graphic and thereinforced thermoseting plastic pressure-relating term including bonding or mechanical assembly procedures shall be addressed, if applicable.		
	appicade.		
) Materials The Cashing Spent and Garco bas he method used to ensure it but only acceptable materials (including entiting manife) are used for report and alterations. The Cashing Spettern shall include a description of excellengy material is including and excellenges and alteration of the Cashing Spatern shall includely be tilted for the cashing of preponsible for each functions are a brief description of each functions. The spectrum.	b Macania In menual hand describe the method used to ensure that only acceptable materials (including useding) material) are used for regain rand alterations. The menual shall include a description of how existing methods in a distribution of momentarial is codered, writing, and identified. The menual shall identify the SE of the includiality is reported to each function and a bird description of how the function is to be performed.		
and any many and and and any many and any and any and any approximate the second	include a description of how existing material is identified and new material is ordered, writed, and identified. The manual shall identify the SSe of the individualis) responsible		
On E2023 the Methof of Performing Wiork changed to include controls for Welding, NDE and Heat Treatment	() Method of Performing Work The manual shall describe the methods for performing and documenting repairs and		
	() Mathod of Performing Work The measure shall describe the methods for performing and documenting repairs and dimension in main/cale data to permit the trapector to determine at effect stages specific trapectors are to be performed. The method of repair or alleration must have prior acceptance of the impector.		
() Welding The Quality System shall identify the title(s) of the individual(s) responsible for the waldner covering specification (WDS). Its qualification, and the qualification.	k) Welding, NDE, and Heat Treatment The manual shall describe controls for welding, nondestructive		
In a Usality of yourn state interpret you to trapp or the Movissality in supportant of the Workshop of the Workshop of the Workshop of the Workshop of Workshop of the Workshop of	The manual shall describe controls for welding, nondestructive examination (NDE), and heat treatment. The manual is to indicate the tills of the individual(s) responsible for the welding procedure specification		
spenators shall be used in the repair or alteration of pressureretaining items.	specification		
KBIC. The Quality System shall also describe controls for ensuing that the	welding operators. It is essential that only welding procedure		
the welder or welding operator prior to welding and establish the basis for welder to	specification (1975) and the galaritisation, and the galaritication of weblew and weblications and weblew are webling spectrum galaritisation symplect particulations and weblew are webling spectrum galaritisation symplect planes.
